SUMMARY

Full-stack software engineer with experience in React, TypeScript, and Next.js, passionate about building scalable, user-centric applications.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, HTML, CSS

Frameworks: Next.js, Node.js Express, Astro

Developer Tools: Git, VS Code, GitHub, PostMan, Trello, Figma, Vercel, Netlify, Clerk, Appwrite, JSON, REST API

Libraries: React, MongoDB, Tailwind CSS, Bootstrap, Jest

EDUCATION

Ashford University

Healthcare Administration

- Selected for membership in the Golden Key International Honor Society, recognizing top-performing students
- Maintained consistent academic excellence, earning placement on the Dean's List

Full Stack JavaScript Software Engineer Training Academy

PROJECT

Apartment Building Management System | *Typescript, React, Tailwind CSS, ASP.NET, PostgreSQL, Supabase, Figma*

- Engineered the tenant dashboard architecture using React and TypeScript, implementing features including smart lock controls, package management, and real-time notifications.
- Created a component library including forms, cards, and skeleton loaders, establishing consistent UI patterns and reducing code duplication across the application.
- Developed an AI insights dashboard that processes tenant data to provide management personalized recommendations for maintenance solutions.
- Built a robust notification system handling multiple alert types with real-time updates, using React hooks for state management and Axios for API integration.
- Implemented responsive layouts using Tailwind CSS, ensuring optimal user experience across all device sizes while maintaining consistent design patterns.

EXPERIENCE

Volunteer Full-Stack Engineer

February 2025 – Present

Games for Love (Nonprofit Organization)

- Designed and prototyped frontend screens for a React Native livestreaming and donation platform using Miro, Figma, and PWA templates, supporting the Operations team's initiatives.
- Integrated Stripe to securely process in-app donations, contributing to the platform's fundraising capabilities for livestream and giveaway campaigns.
- Collaborated with project managers via Trello and weekly stand-ups to meet specifications, align development priorities, and ensure timely feature delivery.
- Contributed to responsive design improvements across mobile, tablet, and desktop to ensure a seamless user experience.

Freelance Full-Stack Web Developer

August 2022 – Present

Independent Consultant

- Developed and launched custom, mobile-responsive websites and web applications for small businesses across five industries, creating seamless digital experiences for their customers.
- Managed complete development life cycles from initial client consultations through deployment, handling requirement gathering, design, development, and launch phases while adhering to project timelines and budget constraints.

- Developed e-commerce solutions by integrating clients' Square and Clover systems, enabling seamless online ordering and mobile payments, which enhanced user convenience and drove increased sales through an optimized digital presence.

Health and Safety Operations Lead

November 2019 – Present

Walmart Distribution Center

- Developed and implemented new workflow systems to improve lift driver efficiency and operational productivity, while maintaining safety standards and quality control.
- Led health and safety operations, including conducting thorough root cause analysis of workplace incidents and implementing corrective actions to enhance workplace safety. Successfully presented and obtained approval for new safety procedures from the review board.

Volunteer Front-End Developer

Sep. 2023 – December 2023

Code For America - Austin Brigade

- Collaborated with a diverse team of developers and designers in an open-source environment to enhance the functionality of the open-austin.org website.
- Optimized navigation elements by implementing Next.js components, reducing load times and improving overall site performance, leading to a smoother browsing experience for users.
- Enhanced UX by optimizing navigation and performance, improving site usability.

Lead Technician, Business Class Cable Installation

September 2013 – November 2019

Time Warner Cable

- Led and supervised a team of 5 technicians in installing and maintaining commercial-grade services for business clients across multiple locations.
- Managed complex business-class installations from initial site surveys through completion, ensuring compliance with local building codes, safety standards, and company protocols while coordinating with property managers and building engineers.
- Developed and executed detailed project timelines, coordinated equipment and personnel resources, and maintained clear communication with clients and internal teams throughout the installation process to ensure minimal business disruption.
